## DETAILED ACTION

1. Applicant's arguments, see lines 15-24 of the Remarks on page 11, filed 11/08/04, with respect to claims 1 and 16 with respect to the Welland reference have been fully considered and are persuasive. The rejection of claims 1 and 16 with respect to the Welland reference has been withdrawn. The rejection of claims 1 and 16 with respect to the Reber reference has been amended below.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Reber (U.S. Patent No. 6,393,070).

In reference to claim 1, Reber discloses in Figure 4 a switched capacitor circuit comprising: a first positive side switch element (47A) for selectively connecting the first positive side first node to a second node according to a first control signal (C), wherein the first positive side node is connected to a positive side capacitor (51A); and a precharge circuit (46A) connected to the first positive side node for precharging the first positive side node to a precharge voltage for a predetermined time (which is seen as the time when switch 46A is closed) when the switched capacitor circuit is switched off (see column 5, lines 6-8); wherein the predetermined time is independent of the first

control signal (C) (the predetermined time is controlled by a second control signal (P).

The same applies to claim 16.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1 and 16 have been considered but are moot in view of the new ground(s) of rejection.

***Allowable Subject Matter***

5. Claims 3-15 and 18-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claims 3-15 and 18-30 would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 5 wherein the precharge circuit comprises a second positive side switch (58); a precharge switch element (56); and a delay unit (60) in combination with the rest of the limitations of the base claims and any intervening claims.
